

## CONSENT & RELEASE FOR MICROBLADING PROCEDURE

This form is designed to give information needed to make an informed choice of whether or not to undergo a microblading and/or freckling procedure. If you have questions, please don't hesitate to ask. Although Microblading is effective in most cases, no guarantee can be made that a specific client will benefit from the procedure.

This is the process of inserting pigment into the dermal layer of the skin and is a form of tattooing.

All instruments that enter the skin or come in contact with body fluids are disposable and disposed of after use. Cross contamination guidelines are strictly adhered to.

Generally, the results are excellent. However, a perfect result is not a realistic expectation. It is usual to expect a touch-up after the healing is completed.

Initially the color will appear much more vibrant or darker compared to the end result. Usually within 7 days the color will fade 40-50%, soften and look more natural. The pigment is semi-permanent and will fade over time and will likely need to be touched-up within 6 months to 2 years.

**I, \_\_\_\_\_ am over the age of 18, am not under the influence of drugs or alcohol, am not pregnant or nursing and desire to receive the indicated semi-permanent pigmentation eyebrow procedure. The general nature of cosmetic micro-pigmentation, as well as the specific procedure to be performed, has been explained to me.**

- If an unforeseen condition arises in the course of the procedure, I authorize my therapist to use his/her professional judgment to decide what he/she feels is necessary under the given circumstances. I accept the responsibility for determining the color, shape and position of the microblading procedure as agreed during pre-drawing on day of procedure. I fully understand and accept that non-toxic pigments are used during the procedure and that the result achieved may fade over a period of 1-3 years. Even once the color fades, pigment itself may stay in the skin indefinitely.

- I have been informed that the highest standards of hygiene are met and that sterile, disposable needles and pigment containers are used for each individual client, procedure and visit.

- I understand and accept that microblading is a process requiring multiple applications of pigment to achieve desired results and that 100% success cannot be guaranteed during the first procedure. I understand that I may have to return for a repeated procedure.

- The result of the procedure can be affected by the following: medication, skin characteristics (dry, oily, sun-damaged thick or thin skin type), personal pH balance of your skin, alcohol intake and smoking, post procedure after care.

- I understand that with oily skin types, strokes can heal less crisp, expanded and/or blurry and may result in a powder-brow effect.

- Upon completion of the procedure there might be swelling and redness of the skin, which will subside within 1-4 days. In some cases, bruising may occur. You may resume normal activities following the procedure, however, using cosmetics, excessive perspiration and exposure to the sun should be limited until the skin has fully healed. Please see after care instructions for more details. The procedure results will look acceptable for you to appear in public without additional make-up on the brows.

- I have been advised that the true color will be seen 6 weeks after each procedure, and that the pigment may vary according to skin tones, skin type, age and skin condition. I understand that some skin types accept pigment more readily and no guarantee on exact color can be given.

- To my knowledge, I do not have any physical, mental or medical impairment or disability that might affect my well being as a direct or indirect result of my decision to have the procedure done at this time.

- I agree to follow all pre-procedure and post-procedure instructions as provided and explained to me by the technician. Failure to do so may jeopardize my chances for a successful procedure. I can confirm that I have received a copy of after care details.

## **POSSIBLE RISKS OR COMPLICATIONS**

- **Pain:** There is a possibility of pain or discomfort even after the topical anesthetic has been used. Anesthetics work better on some people than others.
- **Infection:** Although rare, there is a risk of infection. The areas treated must be kept clean and only freshly cleaned hands should touch the areas. See “After Care” for instructions.
- **Uneven Pigmentation:** This can result from poor healing, infection, bleeding or many other causes. Your follow up appointment will likely correct any uneven appearance.
- **Asymmetry:** Every effort will be made to avoid asymmetry but our faces are not symmetrical so adjustments may be needed during the follow up session to correct any unevenness.
- **Excessive Swelling or Bruising:** Some people bruise and swell more than others. Ice packs may help and the bruising and swelling typically disappears with 1-5 days. Some people don't bruise or swell at all.
- **Anesthesia:** Topical anesthetics are used to numb the area to be tattooed. Lidocaine, Prilocaine, Benzocaine, Tetracaine and Epinephrine in a cream or gel form are typically used. If you are allergic to any of these please inform me now.
- **MRI:** Because pigments used in permanent cosmetic procedures contain inert oxides, a low level magnet may be required if you need to be scanned by an MRI machine. You must inform your technician of any tattoos or permanent cosmetics.

**The alternative to these possibilities is to use cosmetics and not undergo the microblading procedure.**

I have been informed of the nature, risks, and possible complications and consequences of permanent skin pigmentation. I understand the permanent skin pigmentation procedure carries with it known and unknown complications and consequences associated with this type of cosmetic procedure, including but not limited to: infection, scarring, inconsistent color, and spreading, fanning or fading of pigments. I understand the actual color of the pigment may be modified slightly, due to the tone and color of my skin. I fully understand this is a tattoo process and therefore not an exact science but an art. I request the semi-permanent skin pigmentation procedure(s) and accept the permanence of this procedure as well as the possible complications and consequences of the said procedure.

**Date** \_\_\_\_\_

## **TOPICAL ANESTHETIC ADVICE**

- **Allergic reaction** can occur from any anesthetics used during the procedure. If you do suffer from an allergic reaction, you should contact your doctor immediately. Allergic reaction response may show through redness, swelling, rash, blistering, dryness or any other symptoms associated with an allergic reaction.
- **Numbness** – We cannot accept responsibility if the area to be treated does not respond to the numbing cream. Each individual is different according to skin type. Some clients report the area to be completely numb, while others may experience some discomfort.
- **Procedure** – For microblading procedure, a numbing cream and gel is used. The anesthetic is placed over the treatment area for 20-30 minutes then carefully removed prior to treatment. As a result of the treatment, combined with the use of the anesthetic, you can expect to experience some redness/swelling that can last 1-4 days. You should always follow your post procedure advice and after care for the best results.

**CONTRAINDICATIONS**

- Liver disease – high risk of infection
- Compromised skin near brow area
- Keloid scarring
- Chemotherapy/Radiation
- Skin conditions like psoriasis, dermatitis, etc near the brow area

**The following medical conditions require a note from your doctor giving consent:**

Diabetes (Type 1 and 2), high blood pressure, pregnancy/nursing, cancer, auto-immune disease, thyroid/Graves’ disease, any other medical condition that causes slow healing or a high risk of infection.

**I have read and fully understand the above information provided and any risks involved with the use of topical anesthetic and I therefore consent to the use of the anesthetic for the microblading procedure.**

**Client Name** \_\_\_\_\_ **Signature** \_\_\_\_\_ **Date** \_\_\_\_\_

Technician’s name Ashley Rubis \_\_\_\_\_ **Signature** \_\_\_\_\_ **Date** \_\_\_\_\_

**PATCH TEST WAIVER**

There is a possibility of an allergic reaction to numbing agent and/or pigments. A patch test is offered however it does not ensure a client will not have an allergic reaction. If waived, I release the technician from liability if I develop an allergic reaction to the pigment. **Patch test must be booked at least 6 weeks prior to the procedure!**

**\*\*\*INITIAL ONE OR THE OTHER, NOT BOTH\*\*\***

I agree to

\_\_\_\_\_ (initial) Waive patch test and I agree to release the owner, artist, and pigment manufacturers from any and all liability to allergic reaction or any reaction to applied pigments.

**OR**

\_\_\_\_\_ (initial) Take a 6-week patch test prior to the microblading procedure. I agree to release the owner, artist, and pigment manufacturers from any and all liability to allergic reaction or any reaction to applied pigments.

## CONSENT AGREEMENT & RECITALS

### **READ EACH STATEMENT CAREFULLY**

*I understand the following completely (initial each statement):*

\_\_\_\_\_ Technicians make no attempt to, or claim to, practice medicine. Some individuals will have complications related to permanent makeup applications. These complications are usually mild and last only a few days. However, extreme complications are always a possibility. If you are healthy and there are no visible reasons for restricting you from receiving a tattoo, you must approve of the procedure and the colour before the application of your permanent makeup.

\_\_\_\_\_ Aftercare instructions have been explained to me and I will follow to the best of my ability. If I have questions I will call or email you.

\_\_\_\_\_ A certain amount of discomfort is associated with this procedure and that swelling, redness and bruising may occur.

\_\_\_\_\_ Retin A, Renova, Alpha Hydroxy and Glycolic Acids must not be used on the treated areas. They will alter the color.

\_\_\_\_\_ Sun, tanning beds, pools, some skin care products and medications can affect my permanent makeup.

\_\_\_\_\_ I will tell all skin care professionals or medical personnel about my permanent makeup procedures, especially if I'm scheduled for an MRI.

\_\_\_\_\_ I understand that if I have any skin treatments, injectables like Botox or filler, laser hair removal, plastic surgery or other skin altering procedures, it may result in adverse changes to my microblading procedure. I acknowledge some of these potential adverse changes may not be correctable.

\_\_\_\_\_ I accept the responsibility for explaining to you my desire for specific colors, shape, and position for any procedure done today.

\_\_\_\_\_ Implanted pigment color can slightly change or fade over time due to circumstances beyond your control and I will need to maintain the color with future applications and a touch up session within 8 weeks.

\_\_\_\_\_ I acknowledge that the proposed procedure(s) involve risks inherent in the procedure and have possibilities of complications during and/or following the procedures such as: infection, misplaced pigment, poor color retention and hyper-pigmentation.

I certify that I have read or have had read to me, and have initialed, the contents of this form. I understand the risks and alternatives involved in this procedure(s) and I have had the opportunity to ask questions and all of my questions have been answered. I acknowledge that I have reviewed and approved the material given to me and I authorize **Ashley Rubis**, as my microblading artist to perform on my body the microblading procedure desired today.

## **DISCLOSURE & RELEASE FORM**

### **READ EACH STATEMENT CAREFULLY**

*I understand the following completely (initial each statement):*

\_\_\_\_\_ Microblading can last 6-18 months depending on how my skin reacts to the procedure. There may be fading and/or discoloration. The result may not be what I expected to receive. I understand this is a semi-permanent makeup procedure that may take numerous follow-ups and touch ups to get desired result. One complimentary touch up is included in the price of today's procedure. I must schedule the touch up for 6 to 8 weeks after my initial treatment.

\_\_\_\_\_ There is no warranty or guarantee made to me as a result of this procedure and the final result cannot be guaranteed. There are no refunds for this procedure, as results will vary and individual results are not guaranteed.

\_\_\_\_\_ I have seen and agree with the pre-draw shape that my artist created. I understand that this is a guideline for the shape and size of my brow design and it may vary slightly once the procedure is done.

\_\_\_\_\_ There may be risks and hazard related to performing this procedure.

\_\_\_\_\_ There may be discomfort and pain during this procedure.

\_\_\_\_\_ There is a possibility of bleeding, swelling, redness and allergic reactions to pigments.

\_\_\_\_\_ Microblading is considered semi-permanent and can/will fade over time.

\_\_\_\_\_ Microblading, though semi-permanent, may last permanently and may not fade.

\_\_\_\_\_ Final result cannot be determined until brows are completely healed at 6 weeks.

\_\_\_\_\_ I understand that permanent and semi-permanent makeup procedures cannot be guaranteed and results cannot be predicted, as there are many variables that contribute to the final result, such as aftercare, skin type, lifestyle, etc. Microblading is not a replacement for a "makeup" look and some clients may still feel the need to fill in their brows.

\_\_\_\_\_ I have received aftercare instructions and will follow them to ensure results of my procedure are satisfactory.

\_\_\_\_\_ I am NOT pregnant

\_\_\_\_\_ I am NOT under the influence of drugs and/or alcohol or any other mind-altering substance

\_\_\_\_\_ I fully understand the procedure and give permission to my technician to perform the service of Microblading and all procedure and steps involved.

\_\_\_\_\_ I have truthfully filled out the consent form and have informed my technician of all medications I have taken.

\_\_\_\_\_ I release Ashley Rubis of all claims and injury, seen or unseen that may occur as a result of this procedure.

### **RELEASE OF ALL CLAIMS**

Ashley Rubis shall perform permanent application of dyes to the skin of the releaser. Whereas releaser has been informed as to the methods and procedures concerning the result of such treatments, a patch test will also be performed prior to the procedure, if requested by the client, to detect any signs of allergies. I hereby release, acquit, and discharge Ashley Rubis and any and all persons which are or might be claimed to be liable to me from all claims and demands or whatever nature, actions or causes of action, damages, loss of service, cost, expenses and compensation on account or in any way growing out of personal injuries and property damage as a result at any time in the future, whether or not they are in contemplation of parties at the present time and whether or not they arise following the execution of the release as the result of treatment procedure rendered. Releaser agrees to indemnify the hold harmless of Ashley Rubis for any loss, damage, claim, injury, or expense asserted against myself.

I have read and understand the release agreement \_\_\_\_\_(client)

\_\_\_\_\_(technician)

## MICROBLADING EYEBROWS FEES & POLICIES

Please read carefully and initial or sign where indicated.

- The cost of the microblading procedure is \$400 – includes the initial session and touch up 6-8 weeks later
- A \$100 deposit fee is required to schedule your microblading, but will be applied toward your final total. This is **non-refundable** as we are reserving a large time slot especially for you.
- Please do not book this appointment if you are not **100% sure** that you want to have this procedure done! It is okay to take your time to think about it!
- If you do book the appointment and **cancel** for any reason, your retainer fee will **NOT** be refunded.
- We understand that schedules sometimes change. If you need to **reschedule** your microblading appointment for any reason, you may keep your deposit on the appointment **if we are given 5 business days notice**. If we do not have 5 business days notice, **we will unfortunately need to collect another \$100 deposit** to schedule another session, as a short notice rescheduling does not give us enough time to fill the spot and the microblading artist loses money.
- Scheduled appointments for the touch up procedure require **48 hours notice for cancellation or rescheduling!** The touch up service is included in the original price **ONLY** when performed within 8 weeks after the initial session. Outside 8 weeks, **or if appointments are missed**, an additional charge will be incurred.

\_\_\_\_\_ I acknowledge that I have read and fully understand the policies.

\_\_\_\_\_ I understand that if I cancel this appointment, I will not get the \$100 retainer fee back.

\_\_\_\_\_ I understand that if I need to reschedule the appointment, I need to give a minimum of 5 business days notice, otherwise I will be required to pay an additional \$100 retainer fee to re-book the appointment.

By signing this form, I am acknowledging that I have read and fully understand the policies. Any questions I have regarding the policies have been answered and explained to me.

## **MICROBLADING EYEBROWS PRE-PROCEDURE ADVICE**

**Please read the following advice carefully and sign at the bottom.**

- Microblading procedure normally requires multiple treatment sessions. For best results, clients will be required to return for at least one touch-up appointment. This will take place 6-8 weeks after the initial procedure. Those with oily skin may require an additional touch up. Please be aware that color intensity will be significantly darker and sharper immediately and a few days after the initial procedure, but the color will reduce by 30-50%
- Although numbing cream is used during the procedure, sensitivity or discomfort may still be felt. Skin may be red and/or swollen after the procedure
- Please do not drink alcohol 24 hours prior to the treatment
- Unless medically necessary, please avoid taking things that thin the blood like fish oils, herbals, Vitamin E, aspirins, Advil
- A patch test can be performed, unless waived by client. It is the client's responsibility to schedule this at least 6 weeks prior to the procedure.
- Please do not shape or wax your brows before the procedure. Your technician will shape brows during the procedure
- No electrolysis for at least 1 week before the procedure
- AHA products and retinols should be avoided for 2 weeks prior to the procedure
- Botox should be avoided 1 month prior to the procedure and 2 weeks after the procedure
- Exfoliating treatments such as microdermabrasion should not be performed within 2 weeks prior to procedure
- Chemical and laser peels should be avoided no less than 6 weeks prior to procedure
- Hormone therapies can affect pigmentation and/or cause sensitivity
- Discontinue use of any brow-growth serums, as it can cause sensitivity/affect pigment

**I agree to follow pre-procedure advice exactly.**

**Date** \_\_\_\_\_

## AFTERCARE INSTRUCTIONS

**Please read the following advice carefully and sign at the bottom.**

Please follow these instructions for 14 days after the procedure to improve and prolong the results of your microblading. If you don't follow these instructions, it can greatly affect your microblading results or put you at risk for infection, scarring or loss of pigmentation!

**Avoid getting anything on the brows, including water, except for cleansing as directed.** Starting 30 minutes after your procedure, please gently blot your brows **every hour** until bedtime, using sterile gauze and a little bit of bottled/distilled water, to remove any excess lymph fluids. You can set an alarm on your phone to help remind you. This is very important to minimize scabbing and allow for better pigment retention!

**Day 1 Cleansing:** Right before bed, gently wash your brows with water and cotton swab. Use room temperature water to lightly wet your brows. Gently pat excess lymph fluid away. Splash rinse and pat dry with clean gauze or tissue. If they look too saturated, use a tissue to carefully blot the excess.

**Day 2-14:** Repeat this washing procedure, very gently every morning and night. If you have oily skin, use aftershave only after washing. Aftershave can include rice-grain sized amount of coconut oil, shea butter, or Aquaphor. If you have normal to dry skin, apply aftershave throughout the day as needed, when brows feel dry. Do not overuse aftershave. Do not pick or rub the brows. The scabs/flakes must fall off on their own or you will risk removing the color and possibly scarring.

- **DO NOT** get the brows wet other than washing. Do not soak the treated area in the bath, pool or hot tub. For 14 days, refrain from swimming in salt water or chlorinated pools, saunas, hot yoga, steam rooms or sun beds. Avoid hot, steamy showers.
- **DO NOT** sweat for 10 days. This means no exercising.
- **DO NOT** expose treated area to direct sunlight. After healed (30 days), use a sunscreen to avoid fading from the sun.
- **DO NOT** apply makeup to the brow area during the healing process. After the brows have healed (14 days, OR after the scab/skin flakes off) you may wear brow if needed.
- **DO NOT** sleep on your face, try to sleep on your back.
- **No other products should touch the brows during healing, other than the aftershave listed above.**
- **Do not touch, rub, pick or scratch** your brows following treatment or during healing process.
- If your eyebrows get wet during the healing process, pat them dry with a clean tissue, **DO NOT RUB.**
- **Avoid** using daily skincare products directly on the eyebrows.
- Wait 4-6 weeks before having facials/peels. Please inform therapist of the procedure you have had.
- If you are due to give blood after the procedure, please inform your nurse about the microblading treatment you have had as this might alter the results.
- If brows become painful, red or oozy, please see a physician. This could be signs of an infection. It is normal to be sore and red right after, but if it persists and gets worse, this is cause for concern.
- Email me with any questions or concerns [ashley@flawlessedgebeauty.com](mailto:ashley@flawlessedgebeauty.com)

**WHAT TO EXPECT - APPEARANCE**

Initially, your brows will appear more bold than usual. Over the first few days, your new brows may appear much darker in colour and more sharply defined. The hair strokes may blend or look wet. There will be a minor amount of scabbing as the skin heals; this will cause dryness and flakiness, which will naturally fall off as the healing continues. This is normal. Please do not scratch or remove the scabs; all the flakiness must fall off naturally to give you the best looking results. Your brows will lighten after a few days as the skin sheds, and the fine hair strokes will become clearer. Please note that the oilier your skin, the less defined your strokes will be after they heal. You may feel they appear uneven at times because of this. When the skin flakes off, many times the microblading strokes appear very light or sometimes it seems that they have disappeared. **THIS IS NORMAL!** This is because there is still a thick layer of protective, opaque skin creating a veil over the pigment. Once you go through a skin cycle (4-6 weeks) the pigment will typically reappear but will be about 30-50% lighter than it was immediately after the procedure.

**I understand and agree to follow aftercare advice exactly.**
